In 1991 and previous censuses, the Aboriginal population was defined using the ethnic origin question (ancestry). The 1996 Census included a question on the individual's perception of his/her Aboriginal identity. The question used in the 2006 and 2001 censuses is the same as the one used in 1996.

* Note: the Chinese (All *) category identified here is calculated as the sum of Chinese, n.o.s. (not otherwise specified), Cantonese, Mandarin, and Taiwanese as these were the only Chinese languages identified in the dataset which is the basis of this graphic profile. A full accounting of Chinese languages would include additional languages, such as Fukien, Hakka, Shangainese, and Chaochow which will be included in the 'Other languages' category of this report. The effect of this is relatively insignificant but readers may wish to understand why other census sources may contain slightly different figures.
